

UPDATE

## PART 1

That book is very (common/ heavy/ **rare**).

I (sold/**borrowed**/ drank) a novel from the library.

We (**watched**/ wrote/ cooked) a documentary about space.

You should (break/ **prepare**/ sing) well for the exam.

Good (**luck**/ job/ weather) on your test tomorrow!

The house is very (**old**/ new/ pretty)

We (**visited**/ sold/ broke) our relatives last weekend.

I (**drank**/ wrote/ sang) a cup of tea with my grandmother.

They plan to (break/ sell/ **visit**) us next month.

We brought some (tools/ **gifts**/ papers) for the children.

We are (cooking/ driving/ **staying**) at a small hotel this week.

There are many flowers in the (road/ **garden**/ sky)

The (**children**/ bikes/ birds) are playing in the yard.

We want to (sell/ break/ **visit**) our grandparents next week.

My grandmother is very (**old**/ new/ loud) but still healthy.

The task was very (**hard**/ cool/ hot)

We (**followed**/ changed/ cut) the instructions carefully.

I already (**checked**/ counted/ copied) the numbers twice.

Please (**submit**/ collect/ print) your report by Monday.

Thank you for your (**help**/ advice/ submit) with the project.

I usually stay at (**home**/ park/ work) on weekends.

My father can (**drive**/ window/ drink) very well.

I like spending time with my (**friends**/ car/ school).  
Let's go for a walk in the (**park**/ factory/ museum).  
Your sister looks very (**pretty**/ expensive/ noisy) today.

The book was very (**interesting**/ expensive / noisy).  
She (**wrote**/ borrowed / repaired) a long email yesterday.  
He has (**completed**/ borrowed / visited) the project on time.  
We need to (**start**/ find/ discover) the meeting now.  
Thank you for your (**support**/ furniture/ luggage) during this difficult time.

It was a (crowded / expensive/ **sunny**) day at the beach.  
We had a big (passport / suitcase/ **breakfast**) at the hotel.  
We (**rented**/ borrowed / repaired) a car for the trip.  
We plan to (borrow / repair/ **visit**) the old town tomorrow.  
We bought some (**gifts**/ tickets / sandwiches) for our family.

The cookies smell very (modern / expensive/ **nice**).  
My mother (**made**/ sold / washed) a chocolate cake.  
I (**mixed**/ carried / cleaned) the ingredients together.  
Could you (**bring**/ throw/ close) some milk from the shop?  
The cake will be ready (**soon**/ outside / upstairs)

The city center was very (**busy**/ quiet / empty) today.  
We visited the (supermarket / airport/ **museum**) in the afternoon.  
We (**ate**/ bought / drove) lunch near the square.  
Don't forget to (**take**/ close / break) some photos.  
We bought some (tickets / sandwiches/ **souvenirs**) before leaving.

The music was very (quiet / empty / **loud**).

We (broke / cooked / **took**) a taxi to the concert.

We (bought / opened / **watched**) the whole show.

I want to (wash / close / **buy**) a T-shirt as a souvenir.

The concert was really (**fun**/ heavy / broken).

The cave was very (expensive / noisy / **cool**) inside.

We (drove / borrowed / **watched**) a short video before entering.

They (**explored**/ cooked / closed) the tunnels for two hours.

We plan to (break / wash / **visit**) the caves again next year.

I enjoyed it very (**much**/ empty / loud).

## **PART 2**

### **Topic: Movies then and now**

- Movies today are very different from movies in the past.
- In the old days, films were only in black and white, and sometimes even without sound.
- In addition to these technological limits, producers had very low budgets.
- Because of the lack of money, actors also earn little money from acting.
- Nowadays, everything has changed: actors and producers can earn a lot of money from producing films.

### **Topic: Artificial Intelligence (2)**

- Over the past decade, artificial intelligence has reshaped industries around the world.
- Early AI systems were capable of handling only simple pattern recognition tasks.
- In the past, high computational costs slowed down the progress of AI development.
- Today, AI engineers design sophisticated models for applications such as language translation.
- Modern AI tools enable businesses to analyze vast amounts of data and make smarter decisions.

### **Topic: Wellness Fair (giống company wellness day)**

- The wellness fair took place on Saturday afternoon, encouraging people to adopt healthier lifestyles.
- More than 60 (con số bất kỳ) participants joined the event, with Dr. A (tên người) leading an engaging fitness workshop

- The fair also included activities like cooking demonstrations, mindfulness sessions, and a fun run.
- After the workshops, prizes were awarded to participants who created the most creative health posters.
- Families enjoyed tasting healthy snacks and discovering practical tips for better overall wellness.

**Topic: Homework next week**

- Before writing, we need to find some information about the place
- That information can revolve around the aspects of people, culture, and history
- You might not find all the information mentioned, but you will find a place with similarities.
- When collecting information about these three aspects, you can compare them with places in your own country.
- This comparison will help you find common ground between the countries.

## **PART 3**

### **Topic: Music Festival**

A: I stayed until the very last moment of the festival and absolutely loved the grand finale. The stage lit up with dazzling lights and fireworks, creating an unforgettable atmosphere. Although getting there was a hassle due to heavy traffic and packed buses, once I arrived, all those inconveniences faded away. In the end, the final performance made every bit of the struggle worthwhile.

B: Normally, I steer clear of festivals, but I decided to give this one a try. Unfortunately, I didn't have a great time. The sound quality was poor, the event schedule seemed chaotic, and to top it off, it started raining heavily. The muddy ground made things even worse, and I spent most of the day feeling uncomfortable. Honestly, I didn't think it was worth the trouble.

C: I really enjoyed the lively atmosphere created by the music. One of the bands on the opening night was so amazing that I couldn't help but sing along. However, everything was quite expensive. The tickets were pricey, and the food and drinks were ridiculously overcharged. I ended up spending more than I had planned. Even though the performances were great, I do hope the organizers will bring the prices down next year.

D: For me, the most memorable part of the festival was its location. The park by the river was vast and picturesque, with plenty of spots to sit and unwind between performances. I enjoyed a nice lunch there, though it was a bit pricey. Some of the shows were enjoyable, but I didn't stay for the entire event. Overall, it was the venue that left the biggest impression on me.

|                                              |   |
|----------------------------------------------|---|
| Who experienced bad weather?                 | B |
| Who loved one of the performances?           | C |
| Who thought it was too expensive?            | C |
| Who found the traffic difficult?             | A |
| Who liked the final performance of the show? | A |
| Who didn't like the festival overall?        | B |
| Who liked the location?                      | D |

### **Topic: Extreme Sports**

A: Before diving into any extreme sport, I truly believe it's crucial to undergo proper training. While these activities can be thrilling, they also carry risks if you're not well-prepared. I've witnessed people injuring themselves simply because they didn't take the necessary precautions. That's why I always make sure to complete a training program and familiarize myself with the safety guidelines before trying something new. With the right preparation, extreme sports can be an amazing experience.

B: I've always had a fondness for more traditional sports such as swimming, running, and tennis. They're enjoyable and easy to incorporate into a routine. However, a few months ago, I had the chance to go bungee jumping during a

vacation, and it turned out to be an unforgettable experience. I didn't anticipate having so much fun! While I still prefer regular sports for daily exercise, I now feel much more open to trying extreme sports occasionally for the thrill.

C: What I appreciate most about extreme sports is the unique way they allow me to connect with nature. Activities like rock climbing and mountain biking enable me to explore stunning landscapes while also pushing my physical and mental limits. It's an escape from the everyday routine, and it makes me feel truly alive. If I had more time and resources, I would love to engage in these sports more frequently, particularly in wild, remote locations.

D: I understand that some people find extreme sports exhilarating, but they've never been significant to me. In fact, I try to avoid them whenever I can. I'm not fond of the idea of placing myself in risky situations just for the sake of excitement. There are many safer alternatives to staying active and enjoying life. I'd much rather take a peaceful walk or do some yoga than jump out of an airplane or scale a mountain. It's simply not my cup of tea.

|                                      |   |
|--------------------------------------|---|
| Who finds extreme sport unimportant? | D |
|--------------------------------------|---|

|----------------------------------------|---|

|                                             |   |
|---------------------------------------------|---|
| Who likes traditional sports like swimming? | B |
|---------------------------------------------|---|

Who enjoys nature?

C

Who always avoids playing extreme sports?

D

**Topic: Music festival (mói)**

A: I went to the festival, but on the first day, I didn't enjoy it much. It felt a bit dull and not very exciting. Still, the stage was bright with lights and fireworks, and the overall atmosphere was unforgettable. The music lifted my mood and made me feel truly happy. Interestingly, by the final day, everything seemed different - I began to enjoy it a lot more. In the end, I was really glad I decided to go.

B: I've been to this festival every year, and of course, I joined again this time. But honestly, I didn't enjoy the music, and the weather made things worse. It kept raining, turning the ground muddy and uncomfortable for everyone. After this experience, I think I won't go again next year.

C: I absolutely loved the energy of the music and enjoyed every part of the program from start to finish. Although it rained a little, it didn't bother me at all. The only thing I didn't like was the expensive ticket. I spent more than I had planned. Despite that, I still had a great time and hope the organizers consider lowering the price in the future.

D: I was one of the musicians performing on the first day of the festival, and I also met several familiar bands there. Even though I only played a few songs, I stayed until the event ended. The pay wasn't great, but I occasionally met some old friends here, which made me really happy. However, I'm still thinking about the long travel distance since the venue was quite far from the city center.

|                                                |   |
|------------------------------------------------|---|
| Who enjoyed the music throughout the festival? | C |
| Who only liked the last day?                   | A |
| Who was disappointed with the weather?         | B |
| Who met old friends again?                     | D |
| Who thought the location was not good?         | D |
| Who didn't like the festival overall?          | B |
| Who thought it was expensive?                  | C |

### **Topic: Career**

A: After graduating, I wanted to take some time to figure out what I truly wanted. I started looking for temporary jobs, but it was quite difficult because most companies don't hire people without experience. Eventually, a game company contacted me, and I agreed to work for them. The job is hybrid, so sometimes I work in the evenings, but I'm fine with that.

B: I went to university right after finishing high school. I had always wanted to become a teacher, so I didn't need to explore other career options. Three months ago, I did an internship at a local school. It was an eye-opening experience, even

though the workload was heavier than I expected. However, I believe it was very worthwhile.

C: When I graduated, I didn't really know what I wanted to do. Some people advised me to start working right away, but I wanted to gain some practical experience first. That's why I applied for various volunteer positions. Although I didn't earn any money, I had the chance to try out different types of work. Looking back, I feel happy with my decision because of the valuable knowledge I gained.

D: When I was younger, I lived near a plumber and sometimes worked with her. She gave me simple tasks like checking for pipe leaks or tightening screws. So later on, it felt natural for me to go to university to become an electrician. Now, when I see short online electrical courses, I wish I had chosen them instead of going to university.

|                                                    |   |
|----------------------------------------------------|---|
| Who did not want to change to other careers?       | B |
| Who thinks it was hard to get the first job?       | A |
| Who enjoys working in a flexible work environment? | A |
| Who enjoyed doing things with their hands?         | D |
| Who thinks their training was too long?            | D |
| Who enjoyed working when training?                 | B |
| Who thinks they benefited from working for free?   | C |

## **PART 4**

### **Topic: Women Mathematicians (version 4)**

1. Achievements obscured by gender
2. Recognizing the accomplishments of pioneering women
3. Men are unfairly given credit
4. A long career demonstrates exceptional ability
5. The labels can change perceptions
6. Striving to create gender balance
7. Uniformity can be a disadvantage

#### **1. Achievements obscured by gender**

Achievements often go unnoticed when gender biases come into play. Many groundbreaking contributions from women in science, technology, and other fields are overshadowed by societal expectations, leading to a lack of recognition for their hard work and dedication.

#### **2. Recognizing the accomplishments of pioneering women**

Recognizing the accomplishments of pioneering women is essential for breaking stereotypes and inspiring future generations. Women like Marie Curie, Ada Lovelace, and Katherine Johnson changed the world with their brilliance, yet their achievements were often marginalized due to their gender.

### **3. Men are unfairly given credit**

Men are unfairly given credit for work that was often a joint effort or even led by women. History has been shaped by this bias, where the achievements of women were either ignored or misattributed, despite their immense contributions to progress.

### **4. A long career demonstrates exceptional ability**

A long career is a testament to one's exceptional abilities. Take the story of a female engineer who spent decades improving infrastructure in underdeveloped regions. Despite her groundbreaking work, she was often overlooked simply because of her gender, but her work left an indelible mark on society.

### **5. The labels can change perceptions**

Labels can change perceptions dramatically. The label of 'genius' or 'pioneer' is often reserved for men, but when a woman is labeled in the same way, it challenges stereotypes and forces society to recognize her contributions. This shift in perception is key to breaking down barriers and opening doors for others.

### **6. Striving to create gender balance**

Striving to create gender balance in the workplace and society at large has become a movement. Companies and governments are starting to realize that diverse teams lead to better solutions, yet the struggle for equal representation continues. The push for gender balance is not just about fairness but also about enhancing productivity and creativity.

### **7. Uniformity can be a disadvantage**

Uniformity can be a disadvantage in many settings. When everyone is expected to conform to the same mold, innovation and individuality suffer. The story of a diverse team at a tech startup shows how embracing different perspectives led to creative breakthroughs, proving that diversity is a powerful asset.

ĐỀ 1

**Part 1:**

I live (far/near/under) the school.

I want to (move/run/stop) to a bigger house next year.

My parents (drive/sing/play) me to school every day.

Sometimes I (walk/jump/sleep) when the weather is nice.

The park in my town is really (pretty/noisy/dirty).

**Keys:**

Near

Move

Drive

Walk

Pretty

**Part 2:****Diễn viên nổi tiếng Jay**

- They left their home country and took Jay to live in the United States
- He started study at the school in that country, and in his free time he did some strength exercise
- Jay was very good at that and he participated in a bodybuilding competition
- At one of these events, an actor agent saw him and gave him a starring role
- It was a major action movie and he gained famous from that film

**Quy trình trồng khoai**

- All you need is some earth, an old potato and a big spot
- An old potato will have little roots, will be a little green, and won't be good for eating
- This color means it is perfect for growing, you should put some earth in the pot and dig it deep down
- When you've done this, you should water it everyday and place it in a sunny spot
- With this care, you should see a potato plant growing after couples of weeks

**Part 3: Volunteering to clean a local park**

**A:** the park is a beautiful place to relax/ ask for others to help

**B:** can't clean the park because of their busy work/ volunteering will help with future employment

**C:** local areas need cleaning/ the cleaning needs to be done regularly

**D:** volunteering is important for students

**A:** I feel very lucky to have this park here. My family and I often go to the park because of the natural landscape here. It's different from the city, which is very busy and full of dust. Unfortunately, I am away this weekend so I cannot help with the cleaning. However, I know my brother and his friends will be very interested in this cleanup so I will ask them if they can help.

**B:** I'm a very busy person and I have to spend this weekend with my family because I only have the weekend as free time. I think young people who don't have families should help. Besides, students and schools also have days off on weekends. I think this volunteering will be very helpful for students' future careers.

**C:** I think this volunteering is a good idea but it doesn't have a long-term vision. When volunteers clean up the park, it will be clean, but it will become busy again after about a month when tourist season arrives. I think we should clean this park regularly about once a month. Surrounding areas such as the lake and local forest should also be cleaned up. We should also have signs telling visitors to clean up their trash. I am very upset when I see a lot of trash on both sides of the road.

**D:** My family and I often spend time at the park. My children love going to the park and they find the park a very interesting place to visit. My son has a dream of becoming a biologist so I think cleaning up this park will be very helpful for my son. I think we should pique children's interest in cleaning. They will be more willing to volunteer and help others.

#### **Part 4: MUSIC**

1. A physically demanding activity
2. A good way to boost your memory

3. A great opportunity to broaden your social circle
4. A way to learn discipline and the importance of routine
5. A creative outlet for expressing emotions
6. Enhanced sensitivity to other people's feelings
7. Develop a greater sense of well-being

## ĐỀ 2

**Part 1:**

I (started/ended/closed) learning English last year.

Every morning I (walk/run/sit) to my class.

On the (first/last/next) day, I met many new friends.

My teacher can (speak/write/jump) three languages.

We often study (together/alone/away).

**Keys:**

Started

Walk

First

Speak

Together

**Part 2:****Quy trình vào animal hospital**

- When you arrive, go straight to the main office to collect your ticket
- You will need to show this to a member of staff at the door before you enter
- Inside the building, you will find a photography exhibition on the ground floor
- Before you look at the pictures, a guide will tell you about the day's event
- These activities will include playing and feeding the animals.

**A famous football player**

- When he was a child, he played for some local teams near his home in Marseille
- He then moved away from his home to join Cannes Football Club in the southern France
- While he was at that club, people throughout France saw that he was a brilliant player.
- After that, he moved to Italy and Spain, where he finished his playing career
- Since he retired from playing, he has worked as a football club manager.

**Part 3: Reading books**

**A:** plans their reading schedule/ reads more than another family member

**B:** reads many books at once/ wants to read a lot of books

**C:** is having difficulty in finishing a book

**D:** thinks that factual books are boring/ has limited time to read books

**A:** My wife often complains about not having time to read, and I say we have to make our own time. So, I often calculate my free time on my phone. so I can know in advance whether I should bring a book to read on the train. My wife often laughs at me for doing so, but I don't mind, as long as I can finish reading so many books.

**B:** I used to struggle very much to finish reading a book that we were expected to read. However, now that I read for my own pleasure, I don't mind too much. I usually don't limit myself to reading one at a time. There are so many titles I can choose from that get me excited. I have a list of books that I want to read in the future.

**C:** I often keep a book on the bedside table to read before going to bed. The problem is, I get tired after reading only half of a page, and I fall asleep. So, I've been reading that one book for half a year now and have only read chapter 2. However, when I read factual books, I find it very interesting and it keeps me awake for hours.

**D:** My job requires reading a lot of books. These books include a lot of facts and figures and they are very boring. When I have free time, I usually want to read light books, like mystery novels or comedy. I often read on the train to work. I have a young child, so when I come home I almost don't have time to read. Therefore, I have to read books when traveling by train. So, a book can last me 1 week.

#### **Part 4: EATING IN CHINA**

1. The origins of Chinese food
2. The influence of philosophy

3. Regional variations
4. Cooking methods
5. The style of eating
6. Changes in the Chinese diets
7. Effects of a changing diet

## ĐỀ 3

**Part 1:**

I am never (late/soon/early) for work.

In the mornings, I attend (meetings/dinner/breakfast).

I eat lunch in the (park/city/village).

I buy food from the (shop/window/car).

I always (cook/drink/breathe) dinner for myself.

**Keys:**

Late

Meetings

Park

Shop

Cook

**Part 2:****Enter the conference hall 2**

- When you collect your pack, go to the lifts on the right
- Take the lift to the third floor and go to the main desk
- Show your pass from the conference pack to a member of staff at the desk
- He or she will tell you your seat number for the talk at the main hall
- Once you are in the hall, someone will help you find your seat

**Natural history center**

- The most important of these is the Natural history center
- The entrance of the center is on the town's main square.
- When you enter the building from the square, you will see a set of stairs to your left
- The ticket office is on the top of these stairs, the staff there are very helpful.
- As well as selling tickets, they can provide maps and useful tour information.

**Part 3: Opinions on flying**

**A:** suggest making flights more expensive/ want to work in other countries

**B:** visit relatives regularly/ try to protect the environment

**C:** like relaxing while they travel

**D:** find flying tiring/ need to fly for their work

**A:** I have a dream that I work as a tour guide. So I understand that I will have to fly to other countries. In my personal opinion, airplanes are currently too cheap compared to the damage they cause to the environment, so I believe we should add taxes to airline ticket prices to make people choose to use other means of transport before they think about flying. I believe that people are also very happy when they can contribute to protecting the environment.

**B:** My family and siblings live quite far from me. So I often have to fly to visit them every month when I have time. We really appreciate the time we spend together and we are happy to be able to meet each other and share our new story. I know that traveling by plane too much is not good for the environment so I often shop online or go to work by bike instead of going by car or I reuse plastic bags and paper bags. In addition, I sometimes volunteer to clean up trash in the neighborhood.

**C:** I was a businessman so I had to fly many times a week. I had to go to other countries to be able to sign wine trading contracts with them. I feel very tired every time I have to fly. Now, my sister and I, whenever we have free time, take the train together and we enjoy that time very much because I can travel while sightseeing and relax without any stress.

**D:** If I have to go somewhere I will choose other means of public transport, not the plane. Every time I go on a plane I feel extremely tired and I just hope time passes quickly so I can get off that plane. However, due to the specific nature of my job, I have to fly to many different locations, so sometimes I cannot avoid having to take this public transportation.

#### **Part 4: TINY HOUSES**

1. live in a small scale
2. motivated by economics
3. advantage

4. homes too big for comfort
5. sharing skill and knowledge
6. making it smaller impact
7. the lasting change

## ĐỀ 4

### **Part 1:**

I imagine you don't want to (love/remember/miss) this.

I (called/told/said) you earlier but you were not home.

Can you be (early/sleepy/ready) before 7pm?

I can (hold/meet/miss) you at your place then.

Don't have too much (talk/pencil/dinner) because we're going to eat cake.

#### **Keys:**

Miss

Called

Ready

Meet

Dinner

### **Part 2:**

#### **My first car**

- I have just passed the test, and I am the proud owner of the driving license
- However, I did not have a car and my parents would not let me drive theirs
- So, when I saw an advertisement in the local newspaper for a cheap second-hand car, I did not waste time
- I called the number in that advert and arranged a meeting to meet the owner on the other side of the town
- We agreed on a price and when I handed over the money, he gave me the keys.

#### **Enter the conference hall 3**

- Go to security desk
- Show confirming letter to security guard
- After security check, you receive visitor's pass
- Enter the conference
- You can welcome...

### **Part 3: Eating and cooking**

- **Ceci**: like to eat with friends
- **Ben**: prefer to eat alone/ need to save money
- **Glo**: like to eat a wide range of dishes/ take a cookery course
- **Alon**: only want to eat a few range of food/ like home cooked food

#### **Part 4: ANTARCTICA - FROZEN LAND**

1. Who is in charge?
2. First step on the ice
3. Where is the end of the earth?
4. Hidden geography
5. Race to the pole
6. Less effort needed
7. Why is it so cold

## ĐỀ 5

### Part 1:

Where is your (home/ lift/ park) ?

Do you talk to (customers/ friends/ cat) at work?

Is the task (easy/ sleepy/ happy) for you?

What do you (prepare/ sing/ jump) in the morning?

What do you like to (watch/ read/ listen) on TV?

#### Keys:

Home

Customers

Easy

Prepare

Watch

### Part 2:

#### Writing about a place

- Before writing about a place, you need to do some research on it.
- It is important to learn about the people and the history there carefully.
- Even if you can not visit the place, your writing will still look similar to real experiences.
- You should also compare that place with your own country.
- Such comparisons will make your writing more interesting and meaningful.

#### Public transportation (1)

- In the past, transportation was only available to the rich
- Then, fast air travel became popular among business people
- Later, buses and trains were introduced as cheaper alternatives
- They made transportation more convenient for everyone
- Today, buses and trains are two of the most common forms of transport.

### Part 3: Music Festival (1)

A: liked the final performance of the show / Found the traffic difficult

B: didn't like the festival overall / experienced bad weather

C: thought it was too expensive / loved one of the performances

**D:** liked the location

**A:** I stayed until the very end of the festival and really enjoyed the final performance. The stage was full of lights and fireworks, and the atmosphere was unforgettable. Earlier, I had some trouble getting there because the traffic was terrible and the buses were crowded. Still, once I reached the venue, I forgot about all the problems. For me, the last performance made everything worth it.

**B:** I usually avoid festivals, but this time I decided to go. Unfortunately, I didn't enjoy it much. The sound system was weak, the program felt disorganized, and then it started raining heavily. The ground got muddy, and I felt uncomfortable for most of the day. Honestly, I thought the whole experience wasn't worth the effort. The only thing I liked was the beautiful park where the event was held.

**C:** I loved the energy of the music. One band on the first night was so good that I couldn't stop singing along. However, everything was extremely expensive. The tickets cost a lot, and the food and drinks were overpriced as well. I ended up spending more money than I planned. Although I enjoyed the performances, I hope the organizers reduce the costs next year.

**D:** The best part of the festival for me was the location. The park near the river was big and very beautiful, with plenty of space to sit and relax between shows. I had a nice lunch there, and the meal was tasty though a little overpriced. Some performances were enjoyable, but I didn't stay until the very end. Overall, the setting of the festival was what impressed me the most.

#### **Part 4: The arrival of the four-day work week**

1. A way of life now out of date
2. Benefits for employees
3. Undesirable financial consequences
4. Unforeseen challenges for employees
5. Difficult to change old habits
6. Unfair for some people

## 7. Alternative solutions worth considering

### 1. A way of life now out of date

For many decades, working five or even six days a week was seen as the norm. However, with modern technology, changing values, and a greater focus on work-life balance, that lifestyle is becoming less relevant. Employees and companies alike are beginning to question whether spending most of one's week at work is still necessary or productive.

### 2. Benefits for employees

Supporters of the four-day work week argue that it offers numerous advantages for workers. With an extra day off, employees have more time to rest, spend with family, or pursue hobbies. Studies show that many people become more focused and productive when working fewer hours, leading to better performance and increased job satisfaction.

### 3. Undesirable financial consequences

Despite its appeal, a shorter work week can also lead to financial strain. Businesses may face higher costs due to hiring additional staff or adjusting pay structures. Some industries—especially those that rely on hourly workers might struggle to maintain profit margins, potentially resulting in reduced services or even layoffs.

### 4. Unforeseen challenges for employees

Not all employees adjust easily to a new schedule. Some may find it difficult to complete the same amount of work in fewer days, which can increase pressure and stress. In fast-paced industries, unexpected challenges may arise, such as scheduling conflicts or missed deadlines, making the transition more complicated than expected.

### 5. Difficult to change old habits

For those who have followed a traditional work schedule for years, switching to a four-day week can be uncomfortable. Old habits and routines are hard to break, and

some individuals may resist change even if it's beneficial. It often takes time and support to help people adapt to a new way of working.

## **6. Unfair for some people**

Although the four-day week sounds ideal for many, it might not be fair to everyone. For example, essential workers, healthcare staff, or those in hospitality may not have the option to reduce their hours. This could create inequality between different groups of employees and cause tension in the workplace.

## **7. Alternative solutions worth considering**

Rather than applying a four-day week to all companies, experts suggest looking at flexible solutions. Some propose allowing employees to choose their working days, while others support shorter daily hours. These alternatives can offer similar benefits without disrupting businesses that rely on traditional schedules.

## ĐỀ 6

## Part 1:

Where is the train (station/school/market) in this town?

The bus (runs/ stops/ flies) here every morning.

The traffic light is (red/ blue/ green) so you can go now.

We usually have (breakfast/ lunch/ dinner) at 7 p.m.

Do you like watching (books/ movies/ games) on weekends?

### Keys:

Station

Stops

Green

Dinner

Movies

## Part 2:

### Films

- Old movies were very different from today's movies.
- That's because the movies were only in black and white, and sometimes without sound.
- Not only did these technological limitations exist, the movies were also low budget.
- Due to the lack of money, actors also had few opportunities to earn money through acting.
- Now things have changed, actors and filmmakers can earn thousands of dollars from film production.

### Weekend activities

- It was held on Saturday morning, there was a 10 km race for adults.
- There were 60 participants, in which Ms. Kamus kept the fastest speed and won.
- After she received the prize, the following time was for children's activities.
- Activities including football, swimming, skipping rope, and the children played together very happily.
- After playing, the children were very hungry and ate with their parents.

### Part 3: Childhood

A: finds today's games harder than before/ enjoys playing with their children

B: enjoyed playing with friends in childhood

C: prefers modern games/ enjoyed reading books as a child

D: waited and hoped to go outside/ enjoyed arts as a child

A: In the past, I really liked playing board games. Now, to limit the children from using computers, I often spend time playing with them. However, I have struggled with them because the games nowadays have more characters and rules, making us think a lot every time we play. Despite this, my children and I still like it and have a good time together.

B: When I was a child, I often played soccer with other children of the same age. We usually played in the schoolyard and sometimes in the open spaces of the neighborhood. We divided into small teams and chased the ball until we were all tired.

C: When I was a child, I didn't like going out to play, so I chose reading books as a form of entertainment. The stories described in the pages of books helped me discover my own world. Later, when I grew up, I started liking modern games with eye-catching interfaces, which help me relax and increase my creativity.

D: When I was a child, I really liked outdoor activities. I remember that on bad weather days, I was always by the window, glued to it, looking outside and praying for the rain to stop. At those times, my mother often gave me paper and a box of crayons. I really enjoyed that drawing activity and often drew at home when the weather was bad.

### Part 4: Mountain

1. Changing the definition of mountain
2. The unique feeling of achievement
3. Publicity of achievement
4. The mistake of misplaced priorities

5. Worrying connections
6. Intimate relationships
7. Focus on stability

### **1. Changing the definition of mountain**

Changing the definition of mountain The term "mountain" has evolved over time, reflecting not only physical characteristics but also cultural significance. In contemporary discussions, mountains may symbolize challenges to overcome or destinations for adventure, transcending their geographical attributes.

### **2. The unique feeling of achievement**

Climbing a mountain often leads to a profound sense of accomplishment. It represents not just reaching a physical summit but also conquering personal fears and pushing one's limits, creating memories that last a lifetime.

### **3. Publicity of achievement**

In today's digital age, sharing achievements has become prevalent. Climbing a mountain is frequently documented on social media, turning personal milestones into public spectacles that inspire others while also raising questions about authenticity.

### **4. The mistake of misplaced priorities**

The pursuit of climbing mountains can sometimes lead to misplaced priorities. While seeking adventure and recognition, individuals may neglect personal relationships or responsibilities, emphasizing the need for a balanced approach to life.

### **5. Worrying connections**

Engaging in extreme sports, such as mountain climbing, can forge strong bonds among participants. However, it may also create worrying connections where individuals prioritize adrenaline over safety, potentially leading to dangerous situations.

### **6. Intimate relationships**

Shared experiences in challenging environments, like mountains, can deepen intimacy in relationships. Couples or friends who navigate the challenges of climbing together often find their bonds strengthened through mutual support and understanding.

### **7. Focus on stability**

While adventure is thrilling, there is a growing recognition of the importance of stability in life. Balancing the desire for adventure with the need for security is crucial, prompting individuals to reflect on their life choices and long-term goals.

### Part 1:

Do you jog in the (park/ film/family) in the morning?

Does the gym offer (classes/ games/ shops) for yoga?

Is English (easy/ crying/ stop) for you?

What do you eat for (breakfast/ fun/ kind) every day?

Do you practice (meditation/ football/ sing) to relax?

#### Keys:

Park

Classes

Easy

Breakfast

Meditation

### Part 2:

#### A new cafe (1)

0. Last week, I went to a new opening cafe on Corner Street

- When I was there, it was very crowded and the staff were very busy on the first day.
- Although it was busy, the staff still arranged a table for me.
- They gave me the menu and when I looked at it, I saw quite a few dishes.
- I chose the most expensive sandwich.
- It tasted quite good and I will definitely go back to this place.

#### Famous singer (2)

- He is a famous singer who is loved by many fans.
- At the age of fifteen, he studied music at a special school.
- Before becoming famous, he had to practice very hard every day.
- With his unique style and clothes, he soon attracted attention.
- Thanks to his talent and personality, he became well- known to a large audience.

### Part 3: Music festivals (2)

**A:** enjoyed the last day/ disliked the bad weather

**B:** disappointed with the festival

C: enjoyed the music at the event/ found the ticket prices expensive

D: liked to meet old friends/ didn't like the venue

A: This was my first time attending the Music Festival, and to be honest, the weather really didn't cooperate. It rained heavily on the first two days, which made it difficult to enjoy the outdoor activities. I still got wet in the tent. But I didn't let that ruin the experience. On the final day, the skies cleared up and the performances were truly amazing — especially the final act in the evening. That last day made it all worthwhile, and I left with some great memories despite the poor weather.

B: I've been to this festival a couple of times in the past, the quality was good the last time I came, but this time is completely different. The sound quality wasn't great, and the whole event just felt disorganised. There weren't enough facilities, and the staff didn't seem prepared to handle the crowd. I couldn't even interact with the band. I don't think I'll be coming back next year. It's simply not worth the money or the time anymore.

C: The festival this year had one of the best line-ups I've seen so far. I absolutely loved the energy of the performances, and the music was spot on throughout the weekend. However, I have to say the ticket prices were far too high, especially for students. I paid almost double what I did two years ago, and although I enjoyed the music, I'm not sure it offered good value for money. If they don't lower the prices next year, a lot of people might skip it.

D: We were playing in a band and we finished our performance in the morning. However, I stayed at the festival to meet up with some old band mates. We talked a lot. However, I didn't like the venue. It was too crowded and not well organised. The road to the tent village was also congested. I think they should choose a better location next year.

#### Part 4: WOMEN MATHEMATICIANS

1. Breaking new ground in ancient mathematics
2. Trailblazing computer science
3. Driving space exploration forward
4. Transforming geometry and motion

5. Connecting symmetry to physics
6. Encouraging diversity in STEM
7. Breaking through educational barriers

### **1. Breaking new ground in ancient mathematics**

Long before modern scientific institutions emerged, certain individuals in ancient history established the foundations of mathematics as we know it. One such pioneer was Hypatia of Alexandria, a famous philosopher and mathematician in the 4th century.

### **2. Trailblazing computer science**

The early 20th century saw remarkable advancements in computing, largely propelled by the innovative work of figures like Alan Turing. Turing's concept of a universal machine, capable of performing any computable task, laid the foundation for modern computers.

### **3. Driving space exploration forward**

Humanity's quest to explore the cosmos has been defined by groundbreaking milestones. From the launch of Sputnik 1 to the Apollo moon landings, each mission has broadened our understanding of space and our place in the universe.

### **4. Transforming geometry and motion**

The study of geometry and motion was irrevocably altered by the works of Isaac Newton and later Albert Einstein. Newton's laws provided the mathematical foundation for understanding motion on Earth and in space, while Einstein's theory of general relativity revolutionized our understanding of gravity.

### **5. Connecting symmetry to physics**

One of the most profound ideas in modern physics is the link between symmetry and the laws of nature. Emmy Noether, a brilliant German mathematician, proved a theorem that demonstrated how physical laws are intrinsically linked to symmetrical properties.

## 6. Encouraging diversity in STEM

Despite advancements in science and technology, many groups remain underrepresented in STEM fields. In recent decades, educators and organizations have worked to foster more inclusive environments, offering scholarships, mentorship, and outreach programs.

## 7. Breaking through educational barriers

In many parts of the world, individuals have had to fight for the right to education, particularly in scientific disciplines. A well-known example is the story of 19th-century women who were denied entry to universities.

Together

### Part 2:

#### Company wellness day

- This month, the wellness day took place on Friday, focusing on work-life balance.
- More than 50 employees participated, with Mr. Khan leading a workshop on stress relief.
- Activities included team yoga, time management seminars, and a group walk.
- After the workshops, awards were given for the most creative wellness ideas.
- Employees enjoyed healthy snacks and exchanged tips for managing stress.

#### Workplace evolution

- Previously, employees were confined to rigid nine-to-five work hours.
- Technological restrictions once made remote work a challenge.
- Flexible work models are becoming more common in modern workplaces.
- Managers now utilize software to monitor project progress remotely.
- Today, businesses are exploring shorter workweeks to boost productivity.

### Part 3: Technology in childhood (2)

A: finds modern platforms user-friendly/ enjoys creating tech projects with family

**B:** loved playing with programmable toys as a child

**C:** now enjoys 3D modeling/ loved reading about inventions as a child

**D:** loved exploring early computers as a child/ now prefers tech podcasts

**A:** When I was a child, I enjoyed building simple circuits with my parents using basic kits. Today, I collaborate on tech projects with my cousins just using drag-and-drop coding platforms. These tools make the development process easier, but I always take the time to thoroughly test our creations. It's a wonderful way to foster creativity and work together.

**B:** As a kid, I played with programmable toys like robotic pets alongside my friends. I can still recall the excitement of programming their movements. Those toys sparked my interest in logic and curiosity, and I continue to cherish those early experiences with technology.

**C:** Growing up, I was fascinated by books about inventors and their innovative creations. Those stories inspired my imagination. Today, I design prototypes using 3D modeling software. The tools are much more precise now, but the joy of creating something new still feels just like the excitement of those childhood books.

**D:** I spent many hours as a child exploring my family's old computer, learning basic commands. Rainy days often meant staying indoors and experimenting with different software. Today, I keep up with the latest innovations by listening to tech podcasts. They're not only entertaining but also help me stay connected to the ever-evolving tech world.

#### **Part 4: Digital transformation (Tech Forward)**

1. Redefining business models with technology
2. Enhancing productivity through automation
3. Promoting digital skills training
4. Over-reliance on automated systems
5. Concerns about cybersecurity risks
6. Building inclusive digital ecosystems
7. Focusing on ethical technology development

### **1. Redefining business models with technology**

The interaction between people and technology is continuously evolving. Modern gadgets and software are designed to be more user-friendly, enabling communication through voice commands, gestures, or even facial recognition. This transformation makes technology more intuitive and accessible, enhancing both personal and professional experiences.

### **2. Enhancing productivity through automation**

Smart automation tools are revolutionizing workplaces by handling repetitive and time-consuming tasks. These technologies, often powered by AI, enable employees to concentrate on more valuable work, boosting efficiency and fostering innovation across various sectors.

### **3. Promoting digital skills training**

Educational institutions are increasingly incorporating technology into their curricula to prepare students for future careers. Programs focused on coding, robotics, and digital literacy provide learners with vital skills for the digital age, promoting creativity and enhancing problem-solving abilities.

### **4. Over-reliance on automated systems**

Although digital devices offer numerous advantages, over-reliance on screens can lead to negative consequences. Individuals may experience reduced social interactions, trouble concentrating, and higher stress levels. It's crucial to balance digital engagement with offline activities for maintaining mental and physical well-being.

### **5. Concerns about cybersecurity risks**

Not everyone has equal access to technology, which can result in significant social and economic divides. Those without reliable internet or modern devices may miss out on educational and employment opportunities, making it essential to address these inequalities through policies and community-driven efforts.

### **6. Building inclusive digital ecosystems**

Tech communities unite individuals passionate about technology to exchange ideas, support projects, and collaborate. These groups encourage innovation and creativity, offering mentorship and resources to help transform new ideas into reality.

### **7. Focusing on ethical technology development**

As technology continues to evolve, there is a growing focus on sustainability. Companies are developing eco-friendly products and adopting green practices to reduce environmental impact, ensuring that digital advancements contribute to long-term ecological health.

## ĐỀ 9

### Part 1:

He rides his (bicycle/ house/ fix) to the market every weekend.

The market has several (stop/ stalls/ sky) selling fresh produce.

The park nearby is full of (water/ trees/ fishes), creating a peaceful atmosphere.

For (decoration/ breakfast/ films), she makes toast with avocado and eggs.

In the evening, they enjoy playing (fine/ games/ foxes) with their neighbors.

#### Keys:

Bicycle

Stalls

Trees

Breakfast

Games

### Part 2:

#### Đề dự phòng thêm: Public Transportation (2)

- Due to budget limitations, many cities had fewer bus routes in the past.
- Older buses often lacked air conditioning and comfortable seats.
- City buses today are more efficient than those from a decade ago.
- Modern buses often use electric power, reducing pollution in urban areas.
- Drivers and staff now receive better training to assist passengers.

#### Neighborhood Festival

- The festival was held on Friday evening, featuring live music performances.
- Around 100 people attended, with Ms. Carter leading the organizing team.
- Activities included dance workshops, art displays, and a pet parade.
- After the performances, awards were given for the best food stall.
- Families stayed late, enjoying food and drinks under colorful lights.

### Part 3: Pastimes

A: Enjoys baking with family/ finds modern recipes more creative

B: Loved playing hide-and-seek as a child

C: Loved building model kits as a child/ now enjoys coding

D: Loved exploring nature as a child/ now prefers reading

A: Growing up, I loved baking simple cookies with my grandmother. Now, I bake with my siblings, trying out new recipes from online blogs. Modern ingredients like matcha or vegan substitutes make it exciting, but I have to plan carefully to get the flavors right. Baking together is a fun way to bond.

B: As a kid, I spent summer evenings playing hide-and-seek with friends in our neighborhood. I can still recall the thrill of finding the perfect hiding spot. Those games taught me creativity and quick thinking, and I still smile thinking about those carefree days.

C: When I was young, I spent hours assembling model airplanes and cars. The tiny parts and instructions fascinated me. Now, I've moved to coding, creating apps and websites. The logic of programming feels similar to those kits, but it's more dynamic and rewarding.

D: As a child, I loved hiking in the nearby forest, collecting leaves and rocks. On rainy days, I'd feel bored waiting for the sun. Now, I enjoy reading historical novels indoors. It's calming and lets me explore different eras without leaving home.

#### Part 4: Urban Development

1. Redefining sustainable city planning
2. Encouraging green spaces in urban areas
3. Supporting affordable housing projects
4. Over-reliance on high-rise buildings
5. Concerns about traffic congestion
6. Strengthening community engagement
7. Focusing on renewable energy sources

ĐỀ 10

## Part 1

The weather is (cheap/expensive/great).

We are on a (city/countryside/boat).

We eat dinner (after/then/before) we go to church.

We are going to (drive/see/talk) around.

I hope the weather isn't (too/to/on) hot.

Keys:

Great

Boat

Then

Too

## Part 2:

### Artificial Intelligence

- Over the past decade, artificial intelligence has revolutionized various industries.
- The early AI systems were limited to simple pattern recognition tasks.
- High computational costs previously hindered the development of AI.
- Nowadays, AI engineers build advanced models for complex tasks such as language translation.
- Modern AI tools help businesses to analyze data and make better decisions.

### Music show at the park

- The event was fully planned, financed, and supported by local authorities.
- As a result, entry was free, and around five thousand people attended.
- Many attendees arrived early and browsed local shops before the event began.
- Despite the busy day, workers finished ahead of schedule and watched the famous singer perform.
- The two-hour performance thrilled the audience, leaving everyone in high spirits.

### Part 3: Technology in Childhood (1)

A: Enjoys coding with family/ finds modern tools more accessible

B: Loved playing with toy robots as a child

C: Loved science magazines as a child/ now enjoys app development

D: Loved watching tech shows as a child/ now prefers online learning

A: As a child, I loved playing with basic computer games my dad programmed. Now, I am into teaching my kids to code using user-friendly platforms like Scratch. These tools make programming fun, but I spend time guiding them to understand logic. Coding together builds creativity and teamwork.

B: When I was young, I spent hours building and controlling toy robots with my friends. I remember the excitement of making them move. Those toys sparked my interest in technology, and I still cherish those moments of discovery.

C: As a kid, I devoured science magazines about robots and computers. The articles inspired my curiosity. Now, I develop mobile apps, creating tools for everyday use. Modern software makes development faster, but the thrill of innovation feels the same.

D: I have always been passionate about technology. As a child, I loved watching tech shows on TV, fascinated by gadgets and innovations. Now, I prefer online learning because it offers flexibility and access to the latest digital tools. This shift reflects my continued interest in exploring the tech world.

mini hippo

### Part 4: Technology advances

1. Redefining Human-Technology Interaction
2. Boosting Productivity Through Intelligent Automation
3. Promoting Technology-Based Education Programs
4. Overreliance on Digital Interfaces
5. Concerns About Disparities in Access to Technology

6. Building Innovative Tech Communities
7. Focusing on Sustainable Digital Solutions

## ĐỀ 11

### **Part 1:**

I usually stay at (fish/ tree/ **home**) on Sundays.

My father can (fast/ **drive**/ adorable) very well.

I like spending time with my (cry/ **friends**/ run) after school.

Let's go for a (night/ **walk**/ laugh) in the park.

Your sister looks very (find/ **pretty**/ new) today.

### **Keys:**

Home

Drive

Friends

Walk

Pretty

### **Part 2:**

#### **The first American woman in space**

- Encouraged by her parents, she decided to study science at university.
- Her strong academic record earned her a place in a training program in the United States.
- Her passion for space led Mae to join a dedicated research team.
- As a member of the team, she traveled into space and carried out numerous experiments.
- Some of these experiments involved growing plants and observing animals aboard the spacecraft.

#### **Social media**

- In the past, slow internet speeds made streaming or uploading videos difficult.
- Early platforms offered only basic features like text posts and simple images.
- Over time, social media platforms have greatly evolved in both design and functionality.
- Today's platforms use complex algorithms to personalize and shape each user's feed.
- Many influencers now earn income primarily through brand sponsorships and online ads.

### Part 3: Job and training

A: thinks they benefited from working for free

B: enjoys working during their training/ did not want to choose another job

C: working with their hands/ thinks their training was too long

D: thinks it is very hard to get your first job/ enjoys working in a flexible working environment

A: When I first graduated from school, I wasn't sure what to do, so I joined several volunteer programs with different companies and organizations to gain experience. I really enjoyed volunteering because it helped me decide on a career path and gave me many valuable lessons. I also believe I was able to make a difference through my work.

B: Back in school, I already knew I wanted to become a teacher, so I didn't need to try other jobs. I decided to study education at university, which is free in my country. Last summer, I did some practical training in local schools, and it was extremely helpful for my future career.

C: When I was young, I used to help my neighbor, a plumber, with simple jobs like measuring pipes, loosening screws, and handling tools. It felt very natural for me to learn that kind of work, so later I studied for two years at university to become an electrician. Now, I've learned that there are shorter courses available in this field, and I regret not choosing that option instead.

D: After graduating, I found it really difficult to get a job. I applied to many companies, but none accepted me because I lacked experience. Eventually, I found work at a gaming company that allowed me to work from home. It didn't affect my daily schedule — I worked at night while my colleagues worked during the day — and that arrangement suited me perfectly.

### Part 4: Cultural Exchange

1. Redefining Global Cultural Understanding
2. Encouraging Cross-Cultural Festivals
3. Promoting Language Exchange Programs
4. Overemphasis on Commercial Tourism

5. Concerns About Cultural Preservation
6. Building Mutual Respect Among Communities
7. Focusing on Authentic Cultural Experiences

ĐỀ 12

### Part 1:

My uncle works on a (kids/ **farm**/ fun).

The children were very (pretty/ **excited**/ angry) about the trip.

Turn (up/ down/ **left**) at the next corner.

We walked along the (sun/ evening/ **street**) to the park.

I usually (run/ **drink**/ eat)milk in the morning.

#### Keys:

Farm

Excited

Left

Street

Drink

### Part 2:

#### Mae - The Math girl

- Mae's father worked as a nurse, and her mother was a teacher.
- Her parents motivated Mae to pursue higher education and focus on scientific studies.
- Mae worked diligently and achieved several remarkable milestones.
- She later joined a team, contributing her skills and knowledge.
- Eventually, she had the opportunity to undergo a training program in the United States.

#### A group presentation

- First, we prepared the materials for our group presentation.
- Then, we presented our topic for 10 minutes.
- Throughout the presentation, we used images to explain our ideas.
- After the presentation, other students asked questions.
- Finally, each group member took turns answering the questions.

### Part 3: Childhood memories

A: finds modern books more engaging/ enjoys storytelling with family

B: loved bike riding as a child

C: now enjoys graphic design/ loved drawing as a child

**D:** now prefers museum visits/ loved camping as a child

**A:** When I was a child, I loved sitting by the fireplace listening to my grandfather's folktales. His voice brought every character to life, and those evenings always felt magical—they taught me the power of imagination. Nowadays, I share that same joy with my nieces by reading interactive storybooks on tablets. The animations and sounds make the stories more vivid and exciting for them. Still, I always take care to choose content that's suitable for their age. To me, blending old traditions with modern technology is a beautiful way to keep storytelling alive across generations.

**B:** When I was a young, I used to ride my bike around the village with my friends almost every afternoon. I can still recall the feeling of the wind brushing against my face, the excitement of racing each other, and the pure sense of freedom it brought. Those simple rides weren't just fun—they taught me what independence and adventure felt like, lessons that stayed with me as I grew up. Nowadays, it's a bit sad to see that many children spend more time indoors, glued to screens instead of exploring outside. Sometimes I find myself missing those carefree afternoons when happiness was as simple as pedaling down a dusty road. Thinking back, I realize those moments helped me develop a love for the outdoors and a lasting appreciation for friendship.

**C:** As a kid, I could spend hours drawing animals, trees, and landscapes with my box of crayons and pencils. I loved playing with bright colors and shapes, and I always felt proud showing my drawings to my family. What started as a simple childhood hobby slowly turned into a lifelong passion. Now, I'm a graphic designer, creating digital art for various clients. Modern design tools help me bring my ideas to life with more precision, yet the creative joy I feel is just like it was back then. For me, drawing has always been a way to express myself—and it still fills my days with happiness.

**D:** When I was growing up, I loved going on camping trips with my family in the countryside. We pitched our tents, cooked simple meals over a fire, and spent long nights gazing at the stars. Those moments made me feel deeply connected to nature and left me with unforgettable memories. Sometimes, though, rainy weather would

ruin our plans, and I always felt a bit sad when we had to stay indoors. These days, my adventures have taken a different form — **I enjoy visiting museums and exhibitions instead**. Exploring history through artifacts and stories gives me a similar sense of curiosity and wonder, just in a quieter, more comfortable setting. To me, museums are a gentle way to travel through time and appreciate the beauty of the past.

#### **Part 4: Women Mathematicians (version 2)**

1. Gender obscure achievements
2. Acknowledging achievement of a pioneer
3. Man unfairly credited
4. A long career showing exceptional ability
5. Labels can change perspective on people
6. Attempting to create a gender balance
7. Uniformity is not always beneficial

##### **1. Gender obscure achievements**

For centuries, the achievements of women in mathematics were either omitted from historical records or attributed to male colleagues. Hypatia of Alexandria, one of the earliest known female mathematicians, was respected in her time, yet many of her contributions were later credited to male scholars. Such erasure has been a recurring theme in the history of women in this field.

##### **2. Acknowledging achievement of a pioneer**

Emmy Noether, often described as the most important woman in the history of mathematics, revolutionized abstract algebra and theoretical physics. Albert Einstein referred to her work as "the very expression of the spirit of modern algebra." Only recently has her legacy gained the widespread recognition it deserves, demonstrating a growing effort to acknowledge those once overlooked.

##### **3. Man unfairly credited**

In many historical accounts, the success of male mathematicians has overshadowed the collaborative efforts of their female peers. For example, the development of chaos theory often credits Edward contributions by female mathematicians working in frequently omitted from textbooks and academic narratives.

#### **4. A long career showing exceptional ability**

Mary Cartwright had a mathematical career spanning over six decades. Her work in nonlinear differential equations laid the groundwork for chaos theory, influencing both mathematics and engineering. Despite the challenges faced by women in academia during her time, she maintained a consistent output of high-quality research throughout her life.

#### **5. Labels can change perspective on people**

When female mathematicians are described as "women geniuses" or "female prodigies," the gender label, while well-intended, often implies that excellence is rare among women. Such terms, though celebratory, can unintentionally reinforce the idea that women's success in mathematics is unusual, rather than simply the result of talent and hard work.

#### **6. Attempting to create a gender balance**

To address the gender imbalance in mathematics, organizations now run outreach programs for women, and encourage female mentorship in STEM fields. These efforts aim not to give unfair advantage, but to create equal opportunities in a domain where women have historically been underrepresented.

#### **7. Uniformity is not always beneficial**

In efforts to level the playing field, some institutions have implemented standardized criteria for admissions or research evaluation. However, such uniform methods can sometimes ignore the diverse paths and challenges faced by individuals, particularly women balancing academic and societal expectations. A one-size-fits-all approach may not always foster true equity.

## ĐỀ 13

**Part 1:**

I want to (run/ bye/ **visit**) my grandparents this weekend.

My (books/ trees/ **room**) is very clean and bright.

The weather is (wind/ **hot**/ find) today.

We went to the city by (**train**/ buses/ foot).

I can (hold/ **speak**/ cook) English very well.

**Keys:**

Visit

Room

**Part 2:****Chưa có topic (Workplace evolution)**

- In the past, most workers followed fixed schedules from nine to five.
- Because technology was limited, working from home was almost impossible.
- Modern offices are now moving toward more flexible ways of working.
- Managers now use digital tools to follow project progress remotely.
- Many companies today are trying shorter workweeks to increase efficiency.

**IoT (Internet of Things)**

- The Internet of Things (IoT) links everyday devices to improve their capabilities.
- Early IoT devices faced limitations due to slow internet speeds and compatibility challenges.
- High development costs previously slowed the widespread adoption of IoT technology.
- Nowadays, engineers create smart devices for both residential and industrial applications.
- Modern IoT systems provide real-time data tracking and automation features.

### Part 3: Freetime activity

A: enjoys podcasting with friends/ finds modern apps easier to use

B: loved kite flying as a child

C: now enjoys video games/ loved puzzles as a child

D: loved swimming as a child/ now prefers yoga

A: When I was a teenager, I loved recording short stories on an old tape recorder with my cousins. We spent hours coming up with ideas and acting them out just for fun. These days, we make podcasts using modern apps that make editing and publishing much easier and more enjoyable. Even though technology has simplified the process, we still spend a lot of time planning each episode carefully. For me, podcasting is a creative way to express ideas and connect with people on a deeper level.

B: As a child, I spent many sunny afternoons flying kites in the park with my brothers and sisters. Watching my kite rise high into the sky always filled me with happiness and excitement. Those simple yet meaningful moments taught me patience and coordination. Even now, whenever I see children flying kites, I feel warm memories returning. Those carefree days will always be some of my favorite childhood moments.

C: When I was little, I was fascinated by doing jigsaw puzzles with my family. Carefully fitting each piece into place was both fun and satisfying. Now that I'm older, I often play strategy-based video games, which feel like a modern version of puzzles. They're not only entertaining but also help me stay focused and think critically. For me, these games bring the same sense of challenge and accomplishment that puzzles once did — just in a more dynamic and interactive way.

D: I grew up near a beautiful lake, and swimming there with my friends was one of my favorite things to do. It was such a great way to spend time outdoors, though rainy days sometimes left me feeling bored at home. Nowadays, I practice yoga to relax and recharge after long working hours. It has helped me stay calm, balanced, and focused. Yoga has become an important part of my routine and a great way to take care of both my body and mind.

## **Part 4: WOMEN MATHEMATICIANS (version 3)**

1. Gender obscure achievements
2. Acknowledging achievement of a pioneer
3. Man unfairly credited
4. A long career showing exceptional ability
5. Labels can change perspective on people
6. Attempting to create a gender balance
7. Uniformity is not always an advantage

### **1. Gender obscure achievements**

In 2014, Iranian mathematician Maryam Mirzakhani received the prestigious Fields Prize, the highest honor in mathematics, and the first time in its 70 years that a woman has won it. For centuries, the achievements of women in mathematics were either omitted from historical records or attributed to male colleagues. Many of their contributions were later credited to male scholars. Such erasure has been a recurring theme in the history of women in this field.

### **2. Acknowledging achievement of a pioneer**

Despite the many obstacles women faced in entering the field of mathematics, Sophie Germain stood out as a great female mathematician. Largely self-taught, she pursued her passion in a time when women were discouraged from academic pursuits. She made significant contributions to number theory and elasticity, and her work on Fermat's Last Theorem was particularly notable. In recognition of her groundbreaking efforts, she became the first woman to win a prize from the Paris Academy of Sciences in 1816 - an award originally proposed back in 1716. This longstanding prize had never before been awarded to a woman, highlighting the importance of Germain's achievements and marking a turning point in the acknowledgment of women in science.

### **3. Man unfairly credited**

Maria Agnesi, an 18th-century Italian mathematician, was one of the first women to write a comprehensive mathematics textbook. Her work, the *Instituzioni Analitiche*, was highly praised and became an important reference in the study of calculus. Despite her original contributions, one of the mathematical curves she

described — the "Witch of Agnesi" — was mistranslated from Italian, giving it a mystical name that misrepresented her intent. Moreover, over time, credit for aspects of her work was sometimes attributed to male mathematicians who built upon her ideas. This reflects a broader pattern in history where women's intellectual achievements were overlooked or reassigned to men.

#### **4. A long career showing exceptional ability**

Millicent Fawcett demonstrated remarkable intellectual ability from a young age. At just 19, she delivered a public lecture on Sir Isaac Newton at a time when women rarely spoke in academic settings. Although she did not pursue a professional career in mathematics, her early accomplishments in the subject reflected a sharp analytical mind. Over the decades, Fawcett dedicated herself to advocating for women's education and suffrage, tirelessly working to open academic and political doors for future generations. Her lifelong commitment to intellectual and social progress stands as a testament to her exceptional capabilities and enduring influence.

#### **5. Labels can change perspective on people**

When female mathematicians are described as "women geniuses" or "female prodigies," the gender label, while well-intended, often implies that excellence is rare among women. Such terms, though celebratory, can unintentionally reinforce the idea that women's success in mathematics is unusual, rather than simply the result of talent and hard work.

#### **6. Attempting to create a gender balance**

To address the gender imbalance in mathematics, many universities and organizations now run outreach programs, offer scholarships specifically for women, and encourage female mentorship in STEM fields. Some universities are required to arrange places where female mathematicians can work and research. These efforts aim not to give unfair advantage, but to create equal opportunities in a domain where women have historically been underrepresented.

#### **7. Uniformity is not always an advantage**

In efforts to level the playing field, some institutions have implemented standardized criteria for admissions or research evaluation. However, such uniform

methods can sometimes ignore the diverse paths and challenges faced by individuals, particularly women balancing academic and societal expectations. A one-size-fits-all approach may not always foster true equity.

ĐỀ 14

**Part 1:**

I always study in the (**morning**/dinner/laptop) before school.

My (**friends**/cat/fish) and I play football after class.

I always (buy/**leave**/sell) my bag on the chair.

Apples are very (bad/beautiful/**good**) for your health.

We eat rice and (animals/**food**/water) every day.

**Keys:**

Morning

Friends

Leave

Good

Food

**Part 2:****End of term project****0. They all have studied several chapters of local history.**

- Your end-of-term project should focus on at least two of the given topics.
- It must include relevant pictures along with your own written text about the subject.
- You will then use these pictures and your written work to create a class presentation.
- During the presentation, you should summarize your main points, and it should last about five minutes.
- Afterward, your classmates will have the opportunity to ask questions, and you will respond to them.

**Busy coffee shop**

- The café was very crowded when the customer arrived.
- The staff helped them find a table and handed them a menu.
- The customer was surprised because the menu was different from what they had expected.
- They decided to order the most expensive item — a sandwich.
- The customer said the sandwich was delicious and that they would definitely come back again.

### **Part 3: Work and life balance**

**A:** enjoys family time with board games/ finds modern schedules more flexible

**B:** loved organizing pretend offices as a child

**C:** now enjoys productivity apps/ loved reading about careers as a child

**D:** loved outdoor play as a child/ now prefers mindfulness practices

**A:** When I was a child, I enjoyed playing board games with my parents after their busy workdays. Now, I get to share that experience with my own kids, and having a four-day workweek gives us more time together. Flexible schedules are a big help, but I always make sure to plan ahead so I can balance both work and family life. These are the moments that create lasting memories.

**B:** As a kid, I would set up pretend offices with my friends, using toy phones and notebooks. I loved taking on the role of 'boss' and organizing our tasks. Those imaginative games taught me valuable lessons in organization and leadership, and I still laugh thinking about the 'serious' meetings we held.

**C:** When I was younger, I devoured books about different professions, dreaming about what my future career might be. Those books inspired my ambition. Today, I rely on productivity apps to keep track of my tasks in my four-day workweek. While the apps make my work more efficient, the excitement of organizing and planning is still the same.

**D:** As a child, I spent countless evenings playing tag with my friends in the neighborhood. On rainy days, though, I often found myself feeling bored indoors. Now, after work, I practice mindfulness to help me relax and recharge. It's especially helpful with a shorter workweek, as it keeps me focused and refreshed.

### **Part 4: MOUNTAIN SUMMITS**

1. Changing the perspective towards mountain.
2. Unique sense of achievement.

3. Publicity of achievement.
4. The wrong priority.
5. A disturbing relevant.
6. Focus on sustainability.
7. A more intimate relationship.

### **1. Changing the perspective towards mountain**

The term "mountain" has evolved over time, reflecting not only physical characteristics but also cultural significance. Before the 19th century, people were quite shy when it came to conquering mountains. Today, with the development of technology, reaching the highest peaks has become easier. In contemporary discussions, mountains may symbolize challenges to overcome or destinations for adventure, transcending their geographical attributes.

### **2. Unique sense of achievement**

Climbing a mountain often leads to a profound sense of accomplishment. It represents not just reaching a physical summit but also conquering personal fears and pushing one's limits, creating memories that last a lifetime. Besides, mountain climbing also creates Adrenaline - a hormone that creates a feeling of excitement like when playing other extreme sports.

### **3. Publicity of achievement**

In today's digital age, sharing achievements has become prevalent. Even before social media, documenting climbs seemed like a given. Climbing a mountain is frequently documented on social media, turning personal milestones into public spectacles that inspire others while also raising questions about authenticity.

### **4. The wrong priority**

In recent years, some climbers have become more focused on taking photos for social media than respecting the mountains they visit. Long lines form near popular summits as people wait for the perfect picture, often ignoring weather warnings or safety advice. In some cases, this obsession with online fame has led to serious accidents. It shows how personal image is sometimes valued more than safety or responsibility.

## **5. A disturbing relevant**

Mount Everest, once a symbol of human courage, has now become a worrying example of how adventure can harm nature. Every climbing season, long lines of climbers crowd the narrow paths to the summit, leaving behind waste and pollution on the fragile slopes. What used to be a personal challenge has turned into a commercial race, where success is measured by photos and fame rather than respect for the mountain. This situation is disturbing because it shows how our desire to conquer the world's highest peak has created serious environmental and moral concerns.

## **6. Focus on sustainability**

As the number of climbers on Mount Everest continues to rise, the need to focus on sustainability has become urgent. Local authorities and environmental groups are now introducing stricter waste management rules, encouraging climbers to bring back what they carry, and limiting the number of expeditions each season. Some teams have even started "clean-up climbs" to remove rubbish left behind on the slopes. These efforts remind us that protecting the mountain is just as important as reaching its peak. True success on Everest should mean leaving the mountain cleaner and safer for future generations.

## **7. A more intimate relationship**

Shared experiences in challenging environments, like mountains, can deepen intimacy in relationships. Couples or friends who navigate the challenges of climbing together often find their bonds strengthened through mutual support and understanding.

ĐỀ 15

### Part 1:

I go to school by (**bicycle**/boat/yacht)

The buildings in my city are very (short/average/**tall**)

There are many green (trash/books/**trees**) near my home.

I have (lunch/**breakfast**/dinner) with my family every morning.

I do (argument/**meditation**/work) to feel relaxed.

### Keys:

Bicycle

Tall

Trees

Breakfast

Meditation

### Part 2:

#### Tourism

- Modern tourism now provides far more choices than in the past.
- In earlier times, travelers mostly depended on guidebooks and paper maps.
- Back then, limited technology also meant that booking options were quite restricted.
- Today, online platforms allow people to plan thoroughly and book their trips with ease.
- Moreover, local guides now offer personalized tours that give visitors more authentic experiences.

#### Work

- The company offers flexible working hours to better support employees' schedules.
- Her white desk stands out in the shared open office.
- She uses a planner to organize her tasks throughout the shorter workweek.
- At lunchtime, she enjoys a homemade sandwich prepared with fresh ingredients.
- In the evenings, they unwind by reading books on productivity and well-being.

### **Part 3: Watching television**

A: watch TV instead of studying/ like TV programs which continue over several weeks

B: avoid watching reality TV programs/ lost interest in watching football on TV

C: get a lot of knowledge by watching TV

D: isn't a very selective viewer/ keep up to date on cinema and music

**A:** I know I have to spend time studying but there are so many great TV shows. especially horror tv shows, once you watch it, you will be glued to it and can't stop watching. Besides, these TV shows often last for many weeks.

**B:** I often spend time watching news on TV in the evening when I'm free. In the past, I often watched the soccer team I like on TV, but they often lost, so I gave up watching them. Nowadays there are too many reality TV shows being shown on TV. Every time I see these shows, I turn it off and do more interesting things.

**C:** I wasn't good when I was in school because I often spent time watching cartoons on TV. However, I now watch nature documentaries and TV shows about science, history, and business. This helps me expand my knowledge a lot compared to when I was in school.

**D:** My husband usually schedules TV viewing for the weekend, he usually watches football or documentaries. I'm the opposite. I just turn on the TV and it doesn't matter what program it is, because I just need to relax. However, I also want to update news about movies. not just movies, but also songs. I also find reality TV shows very entertaining.

### **Part 4: CHILDREN AND EXERCISES**

1. Factors contributing to inactivity
2. The situation has the potential of being worst
3. The success of a simple idea
4. The wider effects of regular activity
5. Ways in which environment can influence behaviour
6. A design for exercise and for study
7. Achieving the right balance

ĐỀ 16

**Part 1:**

I want to travel to the (**country**/table/board) this summer.

Please keep your room (dirty/old/**clean**).

We have English (cup/**class**/pen) on Monday.

I like helping (**other**/one/else) people.

Can you spell these (**words**/sentences/books) for me?

**Keys:**

Country

Clean

Class

Other

Words

**Part 2:****New coffee shop (3)**

- When I arrived, the place was very crowded, and the staff were extremely busy on the first day.
- Even though it was crowded, the staff still managed to find a table for me.
- They handed me the menu, and when I looked through it, I saw quite a variety of dishes.
- After checking them all, I decided to order the most expensive sandwich.
- It tasted really good with melted cheese on top, and I'll definitely come back to this place again.

**Healthy eating**

- In the past, many meals were high in sugar and unhealthy fats.
- Years ago, limited access to fresh produce made healthy eating much more challenging.
- Modern diets now emphasize fresh, whole foods instead of processed ones.
- Nutritionists today teach people how to create balanced and nutritious meal plans.
- Nowadays, mobile apps help users track calories and discover healthy recipes to support better lifestyles.

### **Part 3: Extreme sports (2)**

**A:** preparation is necessary before doing extreme sports

**B:** once tried an extreme sport and enjoyed it/ usually does ordinary sports

**C:** believes extreme sports are not important/ always avoids extreme sports

**D:** enjoys being outdoors when doing extreme sports/ wishes to do more extreme sports in the future

**A:** For me, the most important thing about extreme sports is being well-prepared. Many people think it's all about excitement and courage, but I don't see it that way. Without proper training, it's easy to get hurt or even put others at risk. I once took a rock-climbing course and spent weeks learning how to use the equipment correctly. After that, the actual climb was much more enjoyable because I felt confident. I believe training not only keeps you safe but also makes the experience more relaxed and rewarding.

**B:** I've always preferred traditional sports like swimming and running because they help me stay healthy without being too risky. Still, I was curious about how extreme sports might feel, so I tried bungee jumping during a holiday last year. At first, I was really nervous, but once I jumped, the feeling was incredible. It was a kind of thrill I had never felt before. Even so, I still swim every week because it's safer and more practical, though I admit extreme sports can be exciting to try at least once.

**C:** Honestly, I don't really understand why people enjoy extreme sports. They seem dangerous and unnecessary to me. I've never tried one, and I don't intend to. Some friends have invited me to go snowboarding or paragliding, but I always refuse. It's not that I dislike sports—I actually enjoy cycling and tennis—but I just don't see any reason to risk my health for a few seconds of excitement. In my opinion, extreme sports aren't essential for happiness, so I stay away from them whenever I can.

**D:** What I love most about extreme sports is that they often take place in beautiful natural settings. Last summer, I went kayaking on a wild river, and the scenery was breathtaking. I also tried mountain biking through the forest and loved the feeling of fresh air and freedom. For me, it's not just about the sport itself but also about

being surrounded by mountains, trees, and rivers. I sometimes wish I had more time and money to do these activities more often. Extreme sports give me energy and make me feel close to nature.

#### Part 4: **ANIMALS**

1. Humour is common
2. What is the purpose
3. How humor helps
4. Take care
5. Differences
6. What we find
7. Why we

ĐỀ 17

## Part 1

My friend lives in the (country/river/mountain).

Her house is very (dirty/clean/noisy).

She is in the same (class/park/door) as me.

I sometimes talk to (other/alone/again) students at school.

We learn a lot of new English (words/numbers/colors).

### Keys:

Country

Clean

Class

Other

Words

## Part 2:

### Famous singer (1)

- He is a famous singer who is loved by many people.
- Before becoming famous, he studied music at a school when he was 15 years old.
- He spent many years practicing and learning how to perform.
- His clothing style and performance on stage were very unique.
- Because of that, more and more people started to recognize him.

### Movies now and then

- Movies today are very different from movies in the past
- In the old days, films were only in black and white, and sometimes even without sound.
- In addition to these technological limits, producers had very low budgets.
- Because of the lack of money, actors also earn little money from acting.
- Nowadays, everything has changed: actors and producers can earn a lot of money from producing films.

## Part 3: Extreme sports

A: find training before participating important

- B: like traditional sports like swimming/ still like extreme sports after playing once  
C: enjoy nature/ want to play more extreme sports  
D: find extreme sports unimportant/ always avoid playing extreme sports

A: Before trying any extreme sport, I believe it's absolutely essential to train properly. These kinds of activities are exciting, but they can also be dangerous if you don't know what you're doing. I've seen people get hurt because they didn't prepare well. That's why I always make sure to take a training course and understand the safety rules before I try anything new. With the right preparation, I think extreme sports can be a great experience.

B: I've always been more into traditional sports like swimming, running, or playing tennis. They're fun and easy to do regularly. But a few months ago, I went bungee jumping during a holiday, and it was an incredible experience. I didn't expect to enjoy it so much! I still prefer regular sports for everyday fitness, but now I'm definitely more open to trying extreme sports once in a while for adventure.

C: What I love most about extreme sports is how they let me enjoy nature in a different way. Activities like rock climbing or mountain biking allow me to explore amazing places while challenging myself physically and mentally. It's a way to disconnect from daily life and feel completely alive. If I had more time and money, I'd love to do these kinds of sports more often- especially in wild, remote areas.

D: I know some people find extreme sports exciting, but for me, they've never been important. I actually avoid them as much as possible. I don't like the idea of putting myself in danger just for fun. There are plenty of safer ways to stay active and enjoy life. I'd rather go for a walk or do yoga than jump out of a plane or climb a mountain. It's just not my thing.

#### Part 4: Wellness trend

1. Redefining holistic health approaches
2. Promoting mental health awareness
3. Encouraging community fitness programs
4. Overemphasis on trendy diets
5. Concerns about wellness misinformation

6. Building supportive health communities
7. Focusing on sustainable lifestyle changes

### **1. Redefining holistic health approaches**

In recent years, the definition of health has broadened to encompass more than just physical well-being. Holistic approaches emphasize the interconnection of the body, mind, and environment, encouraging individuals to consider emotional balance, mental clarity, nutrition, and lifestyle habits collectively. This more comprehensive view helps people achieve deeper and more sustainable wellness by addressing various aspects of life rather than isolated symptoms.

### **2. Promoting mental health awareness**

Mental health has become a growing priority in public health discussions. Awareness campaigns aim to reduce the stigma surrounding mental health disorders and encourage open conversations about personal struggles. Educating people on recognizing early signs of anxiety, depression, and stress empowers them to seek help sooner. Many organizations also provide support networks and resources to build a more compassionate and understanding society.

### **3. Encouraging community fitness programs**

Community-based fitness initiatives are becoming more popular as a way to make exercise enjoyable and accessible. By participating in group activities such as yoga, walking clubs, or sports leagues, individuals not only improve their physical health but also form meaningful social connections. These programs foster a sense of belonging and help individuals stay committed to their fitness goals over time, contributing to healthier and happier communities.

### **4. Overemphasis on trendy diets**

Although trendy diets often promise quick weight loss or improved health, relying too heavily on these fads can be problematic. Many popular diets lack scientific support and may eliminate essential nutrients, leading to unbalanced nutrition. Nutrition experts emphasize that sustainable eating

should focus on balanced meals, moderation, and individual needs rather than quick fixes. Building a healthy relationship with food is more beneficial than chasing the latest diet trend.

### **5. Concerns about wellness misinformation**

The rise of social media and online platforms has led to widespread sharing of health information, but not all of it is accurate or safe. Misinformation about supplements, treatments, and health practices can cause confusion or even harm. It's crucial for individuals to critically assess sources, consult healthcare professionals, and rely on evidence-based guidance when making decisions about their wellness routines.

### **6. Building supportive health communities**

Supportive wellness-focused communities play an essential role in helping people maintain healthy lifestyles. Whether online or through local meetups, these groups offer encouragement, share tips, and provide accountability. Members can exchange experiences, celebrate successes, and find motivation during challenges, creating an environment where individuals feel empowered to achieve their health goals.

### **7. Focusing on sustainable lifestyle changes**

Achieving long-term health requires more than temporary diets or exercise bursts. Sustainable wellness involves making gradual changes that can be maintained over time, such as improving sleep habits, managing stress, and incorporating regular physical activity. By setting realistic goals and making incremental adjustments, individuals are more likely to experience lasting benefits and enhance their overall quality of life.

ĐỀ 18

### Part 1:

Many people believe the climate will (**change**/ sleep/ sing) soon.

This summer feels much (harder/ **hotter**/ quieter) than last year.

We should (**plant**/ break/ chop) a tree every year.

Try not to use too much (**plastic**/ paper/ laptop) when shopping.

Small actions can make (everyone/ **something**/ nothing) a big difference.

### Key:

change

hotter

plant

plastic

something

### Part 2:

#### Topic: College Welcoming Day

- Today will begin at 10 a.m. with a short presentation.
- At the end of the presentation, you will meet the heads of departments and lecturers.
- These staff members will take you on a tour of the school's buildings and sports facilities in small groups.
- During this tour, you will need to stay with these students until lunchtime.
- This meal will be provided on the second floor of the engineering building.

#### Topic: Eating at restaurant

- I decided to try a new café located at the end of the street.
- The place was quite busy, with a lively atmosphere.
- Even so, a staff member quickly noticed me and brought over the menu.
- I was a bit surprised to see that there were only a few items to choose from.
- In the end, I went for the most expensive salad on the menu.

### Part 3:

#### Topic: Volunteering

Who wants to enhance their future career? - **D**

Who helps support charity work with money? - **A**

Who thinks it should help the local community? - **B**

Who thinks volunteering helps improve physical health? - **C**

Who thinks it can improve knowledge about culture? - **B**

Who thinks it is a way to travel? - **C**

Who wants to make new friends? - **D**

**A:** I'm very busy and rarely have any free time to do anything, so even spending a few hours volunteering is quite difficult. I would have to take half a day off work. I see many people in need, and they genuinely require additional financial support. That's something I can help with because I earn a good salary. Making monthly donations is not a problem for me—it's how I show my support and contribution.

**B:** Some people enjoy volunteering abroad, but honestly, I feel that most people are more interested in traveling. I believe we should use our time more meaningfully. Every town has many people in need. Their circumstances are difficult, and they lack the means to improve their quality of life. They are individuals who have contributed a great deal to the country. Sharing stories with them helps us understand the differences between generations. We can also broaden our knowledge of local history, traditions, and culture through their experiences.

**C:** I believe there are many ways for us to show kindness through volunteering. I am currently retired and helping to build houses for people in need. I work with a volunteer organization that has well-prepared and clear plans. Through this work, I have had the opportunity to experience different foreign cultures. We are often sent to various countries to carry out projects, so it's also a great way to travel while still doing something meaningful. This work involves physical labor, which helps improve our physical health—something some people only begin to realize after some time.

**D:** My mother told me to do local volunteering because she is a member of that organization, but I'm not very interested. I prefer volunteering abroad because I can develop soft skills—something that will benefit my future career. In addition, meeting new people helps me expand my network and build valuable connections that I can use later in my professional life.

#### **Part 4: Topic: Digital Innovation**

1. Redefining Leisure in the Digital age
2. Enhancing Connectivity with Mobile Apps
3. Promoting Essential Digital Literacy
4. Risks of Excessive Screen-Based Entertainment
5. Concerns About Data Privacy
6. Building Inclusive and Respectful Online Communities
7. Prioritize human-friendly designs

##### **1. Redefining Leisure in the Digital age**

In today's digital age, technology has fundamentally transformed the way people experience leisure. It has changed how individuals relax, interact with others, and consume entertainment. With innovations such as on-demand streaming services and virtual reality gaming, users can now enjoy highly customized entertainment experiences that match their personal preferences. Nevertheless, these technological advances can blur the line between work and leisure, as smartphones and online platforms constantly compete for people's attention. Therefore, redefining leisure in the modern digital world involves finding a balance between technological convenience and maintaining offline well-being, ensuring that technology improves quality of life rather than creating excessive dependence on digital devices.

##### **2. Enhancing Connectivity with Mobile Apps**

Mobile applications have emerged as powerful tools that strengthen global connectivity. They have significantly changed the way people communicate, cooperate, and build relationships. Through services such as instant messaging, video calls, and AI-powered social platforms, mobile apps allow individuals to interact instantly regardless of geographic or cultural distances. In addition to supporting personal communication, app ecosystems also facilitate professional networking, online education, telemedicine, and international trade. However, the increasing dependence on these technologies can also create challenges, including digital exhaustion and fierce competition for users' attention. To fully realize their advantages, developers should design applications that emphasize accessibility, inclusiveness, and smooth integration into everyday life.

### **3. Promoting Essential Digital Literacy**

As the world becomes more digitally oriented, digital literacy has become a crucial competency for education, career development, and civic engagement. This skill goes beyond basic technical knowledge and also includes the ability to think critically, evaluate information sources, and behave responsibly in online environments. Educational institutions, businesses, and governments need to work together to create initiatives that help individuals effectively navigate digital platforms, protect their personal data, and identify misinformation. Reducing the digital divide is especially important so that disadvantaged communities can also access economic and social opportunities. Strengthening digital literacy ultimately promotes equal access and prepares people for success in an increasingly technology-driven society.

### **4. Risks of Excessive Screen-Based Entertainment**

Although modern technology has greatly expanded entertainment options, excessive dependence on screen-based activities can lead to serious health and social problems. Spending long periods using smartphones, playing video games, or watching online streaming content may cause eye strain, disrupted sleep patterns, decreased physical activity, and shorter attention spans. On a social level, people may feel isolated if digital entertainment replaces meaningful real-life interactions. Addressing these concerns requires a balanced strategy that encourages digital well-being, promotes outdoor activities, and supports mindful

media consumption. As technology continues to evolve, society must redefine healthy forms of entertainment that provide benefits without harming physical or mental health.

## **5. Concerns About Data Privacy**

The rapid expansion of digital technologies has intensified discussions about protecting personal data. As AI-based services, online shopping, and social media platforms grow quickly, users frequently share sensitive information, often without fully understanding the potential consequences. Issues such as data breaches, unauthorized monitoring, and algorithm-based profiling have raised worries about surveillance, misuse of information, and reduced personal autonomy. To address these risks, governments, technology companies, and advocacy organizations need to cooperate in establishing stronger data protection regulations, improving transparency, and giving users greater control over their personal information. In a world where data is increasingly valuable for innovation, safeguarding privacy is vital to maintaining trust and ethical technological development.

## **6. Building Inclusive and Respectful Online Communities**

Online platforms have the potential to connect individuals from around the world, but they can also intensify division, misinformation, and exclusion if they are not properly managed. Creating inclusive digital communities requires thoughtful design that ensures people from various backgrounds feel respected and represented. This process involves addressing problems such as cyberbullying, hate speech, and bias in algorithms, while also ensuring fair access for underrepresented groups. Social media platforms and community-based applications should emphasize transparency, diversity, and cooperative governance, allowing users to influence the standards of online interaction. When inclusivity becomes a central design principle, digital environments can encourage meaningful connections rather than deepen social fragmentation.

## **7. Prioritize human-friendly designs**

In a time of rapid technological progress, intuitive and user-friendly design has become a key factor in the success of digital products. An effective interface is not only visually appealing but also simplifies complex systems, improves

accessibility, and ensures that technology supports users instead of overwhelming them. Many companies now follow human-centered design principles by using user feedback, behavioral data analysis, and accessibility testing to develop products that address a wide range of needs. Focusing on usability not only increases customer satisfaction but also encourages digital inclusion, ensuring that technological innovation remains practical, engaging, and accessible to people of all ages, abilities, and levels of technical expertise.

## READING EXTRA P2

### Part 2:

#### Đề dự phòng thêm: Tech Innovation Expo

- The tech expo was held on Sunday morning, showcasing cutting-edge innovations.
- Over 75 participants attended, with Ms. Tran presenting a smart home device.
- Activities included 3D printing demos, AI workshops, and virtual reality trials.
- After the presentations, awards were given for the most creative prototype.
- Attendees enjoyed networking over coffee and exploring interactive displays.

#### Music festivals

0. Last Saturday, a live music show was held in town park
- The local government planned, funded and paid for everything
  - Because it was free, more than 5,000 people attended
  - People came early and sat in nearby shops waiting for the start time
  - The staff were very busy but still closed the shop early to watch the singer
  - The singer performed for 2 hours, everyone had great fun.

#### Family sports day

0. Last week, the weather was great. The town organized a ten-mile race.
- It took place on Sunday morning in the park, there was a race for adults.
  - Sixty people took part, and among them, Ms. Kamus kept the fastest pace and won the race.
  - After she got her prize, children's activities and competitions began.
  - The activities were football, swimming, skipping, and more, and the kids had fun playing together.
  - After the games, the kids were really hungry and ate with their parents.

#### Means of transportation

- In the past, transportation was primarily accessible to the wealthy.
- Later, air travel became popular among business professionals.
- Eventually, buses and trains were introduced as affordable alternatives.

- These made traveling more accessible to everyone.
- Today, buses and trains are among the most common transportation options.

### **A new coffee shop (2)**

- I arrived at the shop early in the morning, but it was crowded with people.
- A waiter assisted me in finding a table and handed me the menu.
- The menu was not as good as expected and quite pricey, so I decided to order a sandwich.
- The sandwich was both delicious and beautifully presented.
- I might return to try different types of drinks next time.

### **Making films**

0. In 1895, the Grand Place cafe in France showed the first commercial film.

- Old movies were very different from today's movies.
- That's because the movies were only in black and white, and sometimes without sound.
- Not only did these technological limitations exist, the movies were also low budget.
- Due to the lack of money, actors also had few opportunities to earn money through acting.
- Now things have changed, actors and filmmakers can earn millions of dollars from film production.

### **Tech fair**

- The tech fair took place on Saturday morning, showcasing a variety of exciting new gadgets.
- More than 60 exhibitors participated, with Mr. A presenting an impressive robot demonstration.
- The event featured engaging activities such as VR gaming, coding workshops, and thrilling drone races.
- After the demonstrations, awards were given to the creators of the most innovative products.
- Visitors enjoyed complimentary coffee and snacks while exploring the interactive exhibits.

### **The famous singer (2)**

- He is a famous singer.
- Before becoming famous, he studied music at school when he was 15.
- His unique way of dressing and performing made him stand out from others.
- This helped him receive many invitations for collaborations and performances.
- He eventually became famous among audiences around the world.

### **The famous singer (3)**

Jaden Nobelton is only 18 years old and he is a famous singer

- Before becoming famous at his age, he studied art and music in high school.
- During his studies, he studied creativity and singing on stage.
- In these performances, he often wears bright clothes and paints his face.
- The uniqueness in his way of dressing and his songs makes him attract attention.
- Many people follow him on social media and he becomes a famous singer.

### **Writing about a place (2)**

- Before writing, it is important to research the place thoroughly.
- To prepare well, you should learn about the people and the history of the area.
- Sometimes you may not be able to visit the place, but you can still find similar information from other sources.
- Comparing that place with your own country can be very helpful.
- This comparison will help you gain a deeper understanding and write more effectively.

### **My visit to a new coffee shop**

- It was my first time visiting a new local coffee shop.
- At first, I didn't think it would be good, but I decided to give it a try.
- I looked at the menu and saw many different kinds of food and drinks.
- I chose one dish to try for myself.
- When I tasted it, I found it really delicious and knew I would come back again.

### **History to travel**

- In the past, only very rich people could afford to travel long distances.
- The invention of cars and trains had changed everything and made travelling cheaper.
- After these two means of transport, travelling becomes even easier with aeroplanes.
- Because flying with them is so fast, more people now go abroad for holiday and business.
- It is more convenient to travel to other part of the world due to the improvement in transports

### **University open day**

- Before the open day, please contact us by phone or email so we can record your personal details.
- Using this information, we'll prepare an identification card for you to collect upon arrival.
- You'll need to show this card to enter the introductory talk and morning lectures.
- Every visitor will have the chance to join a Q&A session with current students.
- After the presentations, you'll be able to explore different departments across the campus.

### **Topic: Wellness Fair**

- The wellness fair took place on Saturday afternoon, encouraging people to adopt healthier lifestyles.
- More than 60 participants joined the event, with Dr. A leading an engaging fitness workshop.
- The fair also included activities like cooking demonstrations, mindfulness sessions, and a fun run.
- After the workshops, prizes were awarded to participants who created the most creative health posters.
- Families enjoyed tasting healthy snacks and discovering practical tips for better overall wellness.

**Topic: Cultural festival**

- The cultural fair was held on Sunday, celebrating and showcasing local traditions.
- About 60 participants took part, with Ms. A leading a traditional dance group.
- The event featured pottery workshops, folk music performances, and food tastings.
- Families enjoyed taking photos and sharing delicious local dishes together.
- At the end of the event, prizes were given to participants with the best costumes.
